PAST PERFORMANCE

USAFCENT/A1 Decoration Processing Function Awards and Decorations Service
Team JVM supports The United States Air Forces Central (USAFCENT) Decoration Processing Unit (UDPU) by administering a contingency decorations program for commanders, Air Force members (military/civilian), their families, and retirees, providing database management, webpage management, military awards and decorations processing, information management, logistics management, and file management.

Biomedical Engineering Services
JVM provides Biomedical Engineer services managing Computer Aided Design and Computer Aided Manufacture (CAD/CAM) equipment, 3D modeling software, and DICOM imaging systems for medical and dental surgical specialties with emphasis on craniofacial procedures. Services include surgical planning consultation, virtual surgical planning using 3D software, DICOM file import and manipulation, technical presentations and demonstrations, and promotion of 3D medical application utilization across healthcare facilities.

NASA Langley Research Center Occupational Health Program Management Support
JVM successfully converted 3,000+ medical records to electronic health records (EHRs) for NASA Centers, improving health records accessibility, efficiency and data management of NASA community members consisting of 352,100 civil service and contractor personnel. The team developed a well-defined plan for migrating existing medical records to the existing EHR system. By transitioning from paper-based records to electronic systems, healthcare providers can enhance patient care, streamline administrative processes and facilitate better communication among healthcare professionals.
