- Our services are scalable and available when and where agencies need them.
- GSA 8(a) STARS III contract

PAST PERFORMANCE

U.S. Department of the Army, Office of the Chief of Chaplains - Quality Control & Strategic Planning

JVM's subject matter expertise provides operation analysis and support services directly advancing the mission of the U.S. Department of the Army, Chief of Chaplains (DACH) Family Programs by delivering rigorous oversight and stewardship of approved budget programs. From expertly assisting in the oversight of nearly 1,900 events across multiple army commands for more than 22,000 Army personnel and their families, to implementing comprehensive data analytics for targeted information requests, JVM's experts enable mission driven decisions at every step. Our team conducts quarterly validation cycles, confirming that all program components align with federal mandates, and facilitate seamless communication between headquarters and field-based program managers to ensure unified execution across multiple Army installations. Real-time data are maintained and updated on the government web platforms and SharePoint-based management systems in maintaining robust tracking mechanisms for program delivery and budget compliance.

NASA Langley Research Center - Quality Control & Inventory Management

JVM manages comprehensive occupational health Program Management services at NASA Langley Research Center. JVM oversees the full scope of inventory management for medical equipment and supplies at NASA Langley Research Center, serving around 4,000 civil servants and contractors. Our responsibilities included the tracking, ordering, and maintenance of all medical equipment and essential supplies that support occupational health services on site. JVM's team carefully monitors inventory levels, performs regular audits, and responds quickly to replenishment needs, so medical resources are available and compliant when needed.

We run rigorous maintenance schedules for all medical equipment, logging each inspection, servicing, and repair into audit-ready systems that align with both federal privacy laws (including HIPAA, the Privacy Act of 1974, and NASA's records requirements) and industry standards. By coordinating with government stakeholders and conducting regular asset tracking, we safeguard the operational integrity and accuracy of every facility's medical inventory. Our approach covers both physical stock and electronic documentation, enabling JVM to respond efficiently to audits or regulatory reviews while ensuring facility folders and equipment records stay complete, secure, and up-to-date.
